

Burns Lake Community Action Report

- Budget cuts seem to be an issue when trying to access help, told its not covered or in the budget anymore.
 - No help with prescriptions, when needed.
 - Mother is always working and the teenager is home alone, is a common concern in our area.
 - It's hard to ask for help when we have relatives in the "system". Worry about confidentiality etc.
 - Our youth are labelled to easily and given pills as a first response rather then find out what's really going on.
 - No Recovery House for our members, nowhere for them to go when they want to detox and don't wanna leave the community for it.
